ICP-4: Nuclear Families

Bengaluru Quick-Commerce Consumer Acquisition Research

50 Nuclear Family Sub-ICP Segments

Prepared by: Akisha Bhujel

Accesco Living

Sub-ICP 1: Infant & First-Time Parents Routine

Age	30–33 years
Income	₹15–22 LPA
Household Size	3 members
Orders per Week	10–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Baby Products, Dairy Products, Groceries, Medicines
Pain Points	Managing household needs, last-minute baby supplies & milk stock-outs
Key Insight	Infant routine requires daily fresh dairy and urgent diaper/formula replenishment.
Acquisition Channels	Apartment Communities, RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹12K–₹16K
Customer Behaviour / Insights	Relies heavily on quick-commerce for emergency baby care products and daily fresh milk morning deliveries.

Sub-ICP 2: Preschool Toddler Household

Age	31–34 years
Income	₹18–25 LPA
Household Size	3 members
Orders per Week	9–11 orders/week
Peak Ordering Time	Morning School Hours (7 AM - 9 AM) & Evening Dinner Time
Categories Purchased	Dairy Products, Fresh Vegetables, Baby Products, Groceries
Pain Points	School schedules, managing household needs, unexpected snack requirements
Key Insight	Toddler meal prep drives high-frequency ordering of fresh fruits, vegetables, and specialized dairy.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹14K–₹18K
Customer Behaviour / Insights	Orders fresh produce and dairy during early morning play-school prep window.

Sub-ICP 3: Dual-Tech Parents with Toddler & Infant

Age	32–35 years
Income	₹25–35 LPA
Household Size	4 members
Orders per Week	12–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time (7 PM - 9 PM)
Categories Purchased	Baby Products, Groceries, Dairy Products, Medicines, Fresh Vegetables
Pain Points	Managing household needs alongside demanding work shifts and dual baby schedules
Key Insight	High dual income translates to max tolerance for quick delivery fees to save time.
Acquisition Channels	Apartment Communities, Meta Family Targeting, RWA WhatsApp Groups
Monthly Spend	₹18K–₹22K
Customer Behaviour / Insights	Extremely active late evening orders for next-day baby essentials and dinner ingredients.

Sub-ICP 4: Working Mom & Toddler Daycare Routine

Age	30–34 years
Income	₹14–20 LPA
Household Size	3 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, Baby Products, School Supplies, Groceries
Pain Points	School schedules, last-minute grocery requirements, tight morning timelines
Key Insight	Daycare drop-off schedules demand instant availability of quick breakfast items.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹11K–₹15K
Customer Behaviour / Insights	Places quick morning orders for dairy and snacks right before daycare drop-offs.

Sub-ICP 5: Health-Focused Toddler Household

Age	33–36 years
Income	₹20–28 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Dairy Products, Organic Groceries, Baby Products
Pain Points	Managing household needs, finding chemical-free fresh produce for young kids
Key Insight	Prioritizes high quality organic fruits and fresh milk over price discounts.
Acquisition Channels	RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	Orders fresh vegetables and organic dairy daily during early morning hours.

Sub-ICP 6: First-Child Kindergarten Routine

Age	32–35 years
Income	₹16–24 LPA
Household Size	3 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Fresh Vegetables, Dairy Products, Groceries
Pain Points	School schedules, last-minute school project stationery needs
Key Insight	Kindergarten activity demands sudden orders of craft, stationery, and lunchbox snacks.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Frequent emergency orders for school art materials and healthy lunch ingredients.

Sub-ICP 7: Pediatric & Medical Focus Family

Age	31–36 years
Income	₹15–22 LPA
Household Size	4 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Medicines, Baby Products, Dairy Products, Groceries
Pain Points	Managing household needs during frequent child seasonal illnesses
Key Insight	Requires rapid 10-minute delivery for OTC pediatric medicines and rehydration fluids.
Acquisition Channels	RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹12K–₹16K
Customer Behaviour / Insights	Combines emergency OTC pharmacy items with routine dairy and grocery orders.

Sub-ICP 8: Early Years Playgroup & Activity Household

Age	30–34 years
Income	₹19–27 LPA
Household Size	3 members
Orders per Week	10–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Baby Products, School Supplies, Fresh Vegetables, Groceries
Pain Points	Last-minute grocery requirements and sudden playdate catering
Key Insight	Frequent hosting of child playdates creates sudden snack and drink inventory shortages.
Acquisition Channels	Apartment Communities, School Parent Groups
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Orders snacks and juices during mid-morning and late afternoon play windows.

Sub-ICP 9: Nanny-Assisted Toddler Household

Age	33–37 years
Income	₹22–32 LPA
Household Size	4 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Baby Products, Fresh Vegetables
Pain Points	Managing household needs while working full-time remote/hybrid jobs
Key Insight	Parents delegate daily list restocking to quick commerce while nanny supervises toddlers.
Acquisition Channels	RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹17K–₹21K
Customer Behaviour / Insights	Frequent repeat orders for daily staples, specialized milk, and fresh produce.

Sub-ICP 10: Toddler Nutrition & Meal-Prep Focus

Age	30–35 years
Income	₹17–25 LPA
Household Size	3 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Dairy Products, Baby Products, Groceries
Pain Points	Managing household needs, strict toddler dietary requirement prep
Key Insight	Batch cooking daily meals requires continuous availability of fresh, organic ingredients.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Orders daily fresh veggies and specialized dairy precisely during morning hours.

Sub-ICP 11: Single Child Grade-Schooler Family

Age	34–38 years
Income	₹16–24 LPA
Household Size	3 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, School Supplies, Dairy Products, Medicines
Pain Points	School schedules, last-minute school assignment material needs
Key Insight	Tight evening homework schedules lead to last-minute stationery and snack orders.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups
Monthly Spend	₹12K–₹16K
Customer Behaviour / Insights	Orders notebooks, pens, and dinner groceries during 7 PM - 9 PM window.

Sub-ICP 12: Early Morning School Rush Household

Age	35–39 years
Income	₹18–26 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours (6:30 AM - 8 AM) & Evening Dinner Time
Categories Purchased	Dairy Products, Fresh Vegetables, Groceries, School Supplies
Pain Points	School schedules, early morning bus routine, missing lunchbox items
Key Insight	Morning school bus deadlines drive urgent orders for bread, butter, and milk.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Rapid morning orders placed between 6:30 AM - 7:30 AM for breakfast prep.

Sub-ICP 13: After-School Extracurricular Family

Age	36–40 years
Income	₹20–30 LPA
Household Size	4 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, School Supplies, Medicines
Pain Points	Managing household needs around sports and tuition schedules
Key Insight	Packed sports/tuition schedules leave zero time for offline store visits.
Acquisition Channels	School Parent Groups, Meta Family Targeting
Monthly Spend	₹14K–₹18K
Customer Behaviour / Insights	Orders quick energy snacks and evening meal ingredients during dinner prep.

Sub-ICP 14: Working Dual-Career School Parent Household

Age	35–39 years
Income	₹24–34 LPA
Household Size	4 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, Dairy Products, Medicines, School Supplies
Pain Points	Managing household needs, zero time for physical grocery store runs
Key Insight	High household income with severe time poverty relies on quick commerce for all consumables.
Acquisition Channels	Apartment Communities, Meta Family Targeting, RWA WhatsApp Groups
Monthly Spend	₹17K–₹22K
Customer Behaviour / Insights	Multi-category orders placed late evening for next day's household operation.

Sub-ICP 15: Project & Craft Heavy Primary Schooler

Age	33–37 years
Income	₹15–21 LPA
Household Size	3 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Groceries, Dairy Products, Medicines
Pain Points	School schedules, urgent school project materials announced late night
Key Insight	Unplanned school project guidelines drive instant evening orders of craft items.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups
Monthly Spend	₹10K–₹14K
Customer Behaviour / Insights	High reliance on stationery delivery alongside nightly grocery top-ups.

Sub-ICP 16: Gourmet & Quick Prep Dinner Family

Age	36–40 years
Income	₹22–30 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Groceries, Dairy Products, Medicines
Pain Points	Managing household needs, fatigue after work, last-minute meal planning
Key Insight	Evening fatigue pushes family to order fresh vegetables and ready-to-cook pastes daily.
Acquisition Channels	Apartment Communities, Meta Family Targeting
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	Concentrated daily orders between 6:30 PM - 8:30 PM for dinner cooking.

Sub-ICP 17: Health & Immunity Mindful School Family

Age	34–38 years
Income	₹17–25 LPA
Household Size	4 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Medicines, Dairy Products, Groceries
Pain Points	Managing household needs, maintaining family immunity during seasonal changes
Key Insight	Continuous demand for fresh citrus fruits, herbal teas, and OTC wellness items.
Acquisition Channels	RWA WhatsApp Groups, School Parent Groups
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Combines fresh produce with pharmacy supplements in recurring weekly orders.

Sub-ICP 18: Exam Season Intensive Study Household

Age	37–41 years
Income	₹19–27 LPA
Household Size	4 members
Orders per Week	10–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Groceries, Dairy Products, Medicines
Pain Points	School schedules, late-night study sessions, exam pressure prep
Key Insight	Exam times require high volumes of healthy snacks, revision stationery, and milk.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Multiple daily micro-orders during intense study weeks for energy drinks and stationery.

Sub-ICP 19: Weekend Activity & Hosting Family

Age	35–39 years
Income	₹21–29 LPA
Household Size	5 members
Orders per Week	11–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, Medicines
Pain Points	Managing household needs, last-minute guest hosting requirements
Key Insight	Larger household size of 5 creates frequent pantry depletion and quick restock needs.
Acquisition Channels	Apartment Communities, RWA WhatsApp Groups
Monthly Spend	₹17K–₹21K
Customer Behaviour / Insights	Bulk replenishment orders for daily kitchen staples and dairy products.

Sub-ICP 20: Lactose-Conscious / Specialty Diet Family

Age	34–38 years
Income	₹18–26 LPA
Household Size	3 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, Fresh Vegetables, Groceries, Medicines
Pain Points	Managing household needs, finding specialized dairy and allergen-free foods
Key Insight	High dependence on quick commerce for niche plant-based milk and specialty dairy.
Acquisition Channels	Meta Family Targeting, RWA WhatsApp Groups
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Orders plant-based/A2 milk regularly alongside daily family groceries.

Sub-ICP 21: Two School-Going Kids Household

Age	38–42 years
Income	₹20–30 LPA
Household Size	4 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, School Supplies, Fresh Vegetables, Groceries, Medicines
Pain Points	School schedules, managing two conflicting school activity timelines
Key Insight	Double school routines double the frequency of sudden stationery and snack demands.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹17K–₹22K
Customer Behaviour / Insights	High volume ordering during morning prep and post-school dinner hours.

Sub-ICP 22: Infant & Middle-Schooler Gap Family

Age	36–40 years
Income	₹22–32 LPA
Household Size	4 members
Orders per Week	12–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Baby Products, School Supplies, Dairy Products, Groceries, Medicines
Pain Points	Managing household needs across split age groups (baby + school kid)
Key Insight	Must balance diapers/formula with notebooks/pencils in single quick orders.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹18K–₹22K
Customer Behaviour / Insights	Highly diverse product basket delivered multiple times daily to fulfill dual needs.

Sub-ICP 23: Large Gated-Society Family (5 Members)

Age	39–43 years
Income	₹24–35 LPA
Household Size	5 members
Orders per Week	12–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, Dairy Products, Medicines
Pain Points	Managing household needs, rapid daily food & dairy consumption
Key Insight	5-member family runs out of milk and staples rapidly, needing daily 10-min delivery.
Acquisition Channels	Apartment Communities, RWA WhatsApp Groups
Monthly Spend	₹18K–₹22K
Customer Behaviour / Insights	Consistently hits upper limit of weekly order frequency for kitchen staples.

Sub-ICP 24: Twin Kids School Household

Age	35–39 years
Income	₹22–31 LPA
Household Size	4 members
Orders per Week	11–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Dairy Products, Baby Products, Groceries
Pain Points	School schedules, synchronized double demand for school & snack items
Key Insight	Identical school requirements mean buying duplicate sets of stationery and snacks.
Acquisition Channels	School Parent Groups, Meta Family Targeting
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	High quantity orders for school stationery and uniform accessories.

Sub-ICP 25: Sports-Active Middle School Kids

Age	38–42 years
Income	₹19–27 LPA
Household Size	4 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, Fresh Vegetables, Groceries, Medicines
Pain Points	Managing household needs, high child energy & nutrition demands
Key Insight	Heavy sports participation requires constant replenishment of milk, bananas, and OTC gels.
Acquisition Channels	Apartment Communities, School Parent Groups
Monthly Spend	₹14K–₹18K
Customer Behaviour / Insights	Regular evening orders post-sports practice for recovery drinks and dinner goods.

Sub-ICP 26: Hybrid Working Mom of Two

Age	36–40 years
Income	₹20–28 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, Dairy Products, School Supplies
Pain Points	School schedules, balancing remote work with meal preparations
Key Insight	Uses breaks between online work meetings to order dinner ingredients and snacks.
Acquisition Channels	RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Orders mid-day and early evening for dinner cooking and next day's lunchboxes.

Sub-ICP 27: Academic Excellence & Tuition Focus

Age	39–43 years
Income	₹18–26 LPA
Household Size	4 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Groceries, Dairy Products, Medicines
Pain Points	School schedules, late evening coaching class drop-offs/picks
Key Insight	Evening tuition hours leave limited time for cooking, increasing reliance on quick-prep items.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Places targeted evening orders for snacks, notebooks, and quick-cook groceries.

Sub-ICP 28: Tech-Savvy High-Income 5-Member Family

Age	40–44 years
Income	₹28–35 LPA
Household Size	5 members
Orders per Week	12–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, Dairy Products, Baby Products, Medicines
Pain Points	Managing household needs, heavy overall household consumption load
Key Insight	Maximum budget headroom for premium quick commerce services and organic items.
Acquisition Channels	Meta Family Targeting, Apartment Communities
Monthly Spend	₹19K–₹22K
Customer Behaviour / Insights	Frequent high-value orders across all essential categories during morning/evening.

Sub-ICP 29: Mid-Career Single-Earner Family

Age	37–41 years
Income	₹12–18 LPA
Household Size	4 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, School Supplies
Pain Points	Managing household needs on fixed budget, last-minute grocery requirements
Key Insight	Value-conscious but uses quick commerce for urgent household and school items.
Acquisition Channels	RWA WhatsApp Groups, School Parent Groups
Monthly Spend	₹9K–₹13K
Customer Behaviour / Insights	Carefully planned orders focusing on core staples, fresh milk, and basic school supplies.

Sub-ICP 30: Pet-Friendly Nuclear Family with Kid

Age	35–39 years
Income	₹21–29 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, Medicines
Pain Points	Managing household needs, sudden household & pet maintenance requirements
Key Insight	Combines daily family grocery runs with emergency medicine and dairy orders.
Acquisition Channels	Apartment Communities, Meta Family Targeting
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Places multi-item orders covering kitchen provisions and basic healthcare.

Sub-ICP 31: Pre-Teen Middle School Household

Age	41–45 years
Income	₹22–32 LPA
Household Size	4 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, School Supplies, Dairy Products
Pain Points	School schedules, expanding dietary intake of growing pre-teens
Key Insight	Growing pre-teens consume double groceries, driving higher order frequency.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	Orders large quantities of fresh dairy, fruits, and evening dinner ingredients.

Sub-ICP 32: Upper-Primary Single Child Household

Age	40–44 years
Income	₹18–26 LPA
Household Size	3 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Groceries, Fresh Vegetables, Medicines
Pain Points	School schedules, last-minute science project materials
Key Insight	Higher-grade school projects demand specialized stationery on short notice.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹12K–₹16K
Customer Behaviour / Insights	Evening orders focused on school stationery and fresh vegetables for dinner.

Sub-ICP 33: Late-Thirties Tech Manager Family

Age	39–43 years
Income	₹26–35 LPA
Household Size	4 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Fresh Vegetables, Dairy Products, Medicines
Pain Points	Managing household needs, demanding corporate leadership schedules
Key Insight	Severe time scarcity drives adoption of instant delivery for 100% of grocery needs.
Acquisition Channels	Meta Family Targeting, Apartment Communities
Monthly Spend	₹18K–₹22K
Customer Behaviour / Insights	Heavy user of daily quick-commerce slots during early morning and late evening.

Sub-ICP 34: Active Sports & Hobby-Driven Family

Age	42–46 years
Income	₹20–28 LPA
Household Size	4 members
Orders per Week	9–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, Fresh Vegetables, Medicines, Groceries
Pain Points	Managing household needs around weekend matches and training
Key Insight	Continuous need for fresh energy foods, protein dairy, and first-aid items.
Acquisition Channels	RWA WhatsApp Groups, School Parent Groups
Monthly Spend	₹14K–₹18K
Customer Behaviour / Insights	Top-up orders placed during evening dinner hours for immediate sports recovery.

Sub-ICP 35: School Committee Active Parent Household

Age	40–44 years
Income	₹17–25 LPA
Household Size	4 members
Orders per Week	10–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Groceries, Dairy Products, Fresh Vegetables
Pain Points	School schedules, organizing school events and group snacks
Key Insight	Frequently orders bulk school supplies and event snacks on behalf of parent groups.
Acquisition Channels	School Parent Groups, RWA WhatsApp Groups
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	High affinity for school supplies and daily fresh dairy during morning hours.

Sub-ICP 36: Culinary & Baking Hobbyist Family

Age	38–42 years
Income	₹21–29 LPA
Household Size	3 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, School Supplies
Pain Points	Last-minute grocery requirements for baking and specialized cooking
Key Insight	Frequent mid-recipe shortage of baking dairy, herbs, or specialty flour.
Acquisition Channels	Apartment Communities, Meta Family Targeting
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Emergency evening orders for dairy creams, butter, and fresh baking supplies.

Sub-ICP 37: Elderly-Support Mindful Nuclear Family

Age	42–46 years
Income	₹24–33 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Medicines, Groceries, Dairy Products, Fresh Vegetables
Pain Points	Managing household needs while remotely ordering meds for elderly relatives nearby
Key Insight	Combines home grocery needs with urgent pharmacy orders sent to family members.
Acquisition Channels	RWA WhatsApp Groups, Meta Family Targeting
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	High OTC medicine share in daily grocery basket during morning prep.

Sub-ICP 38: Two-Teens Transitioning Household

Age	43–46 years
Income	₹25–35 LPA
Household Size	4 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, Medicines
Pain Points	Managing household needs, massive food consumption rate of growing teens
Key Insight	Teenagers' late-night study and snacking require constant restocking of milk and meals.
Acquisition Channels	Apartment Communities, School Parent Groups
Monthly Spend	₹18K–₹22K
Customer Behaviour / Insights	Heavy weekly consumption of milk, bread, cheese, and fresh dinner produce.

Sub-ICP 39: Compact 3-Member Mid-Income Family

Age	36–40 years
Income	₹12–16 LPA
Household Size	3 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Dairy Products, Groceries, Fresh Vegetables, School Supplies
Pain Points	Managing household needs, avoiding food waste while meeting school routine
Key Insight	Small family size prefers smaller, frequent purchases to maintain fresh quality.
Acquisition Channels	RWA WhatsApp Groups, Apartment Communities
Monthly Spend	₹9K–₹12K
Customer Behaviour / Insights	Disciplined daily micro-orders for fresh milk, bread, and dinner vegetables.

Sub-ICP 40: Wellness & Fitness Dedicated Parents

Age	38–42 years
Income	₹22–30 LPA
Household Size	3 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Dairy Products, Groceries, Medicines
Pain Points	Managing household needs, maintaining strict clean eating regimes
Key Insight	Daily requirement for fresh salad greens, high-protein dairy, and supplements.
Acquisition Channels	Meta Family Targeting, Apartment Communities
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Consistent morning orders for fresh greens and specialized dairy items.

Sub-ICP 41: Gated High-Rise Community Champion Family

Age	35–39 years
Income	₹20–28 LPA
Household Size	4 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, School Supplies
Pain Points	Last-minute grocery requirements, social recommendations in RWA groups
Key Insight	Influenced by community WhatsApp groups for new product adoption.
Acquisition Channels	RWA WhatsApp Groups, Apartment Communities
Monthly Spend	₹15K–₹19K
Customer Behaviour / Insights	Places group-recommended quick commerce orders during peak evening hours.

Sub-ICP 42: Multi-School Schedule 5-Member Household

Age	41–45 years
Income	₹23–33 LPA
Household Size	5 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	School Supplies, Dairy Products, Groceries, Fresh Vegetables, Medicines
Pain Points	School schedules, coordinating multiple drop-off/pick times and school needs
Key Insight	Split school schedules cause double peak ordering during early mornings.
Acquisition Channels	School Parent Groups, Apartment Communities
Monthly Spend	₹17K–₹21K
Customer Behaviour / Insights	Heavy reliance on early morning delivery for dual school lunchboxes.

Sub-ICP 43: Convenience-First Fast-Paced Family

Age	33–37 years
Income	₹24–32 LPA
Household Size	3 members
Orders per Week	11–14 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Baby Products, Fresh Vegetables
Pain Points	Managing household needs, absolute intolerance for out-of-stock items
Key Insight	Prioritizes speed and product availability over price discounts or deals.
Acquisition Channels	Meta Family Targeting, Apartment Communities
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	Orders multiple times daily for instantaneous gratification and kitchen needs.

Sub-ICP 44: Weekend Meal Planner & Weekday Top-Up Family

Age	37–41 years
Income	₹17–24 LPA
Household Size	4 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Dairy Products, Groceries, Medicines
Pain Points	Last-minute grocery requirements when weekend plans fall short
Key Insight	Uses quick commerce for fresh top-ups when meal preps run out mid-week.
Acquisition Channels	RWA WhatsApp Groups, School Parent Groups
Monthly Spend	₹12K–₹16K
Customer Behaviour / Insights	Consistent evening top-up orders for milk, fresh herbs, and vegetables.

Sub-ICP 45: First-Aid & Safety Conscious Family

Age	34–38 years
Income	₹16–23 LPA
Household Size	4 members
Orders per Week	8–10 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Medicines, Baby Products, Groceries, Dairy Products
Pain Points	Managing household needs, keeping home pediatric emergency kit full
Key Insight	Instant ordering habit triggered whenever child medicine stocks deplete.
Acquisition Channels	Meta Family Targeting, RWA WhatsApp Groups
Monthly Spend	₹11K–₹15K
Customer Behaviour / Insights	Bundles OTC health items with standard morning dairy and grocery deliveries.

Sub-ICP 46: Eco-Conscious Sustainable Living Family

Age	36–40 years
Income	₹19–27 LPA
Household Size	3 members
Orders per Week	8–11 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Fresh Vegetables, Dairy Products, Groceries, School Supplies
Pain Points	Managing household needs while seeking eco-friendly packaging
Key Insight	Prefers quick commerce platforms with sustainable packaging options.
Acquisition Channels	Apartment Communities, RWA WhatsApp Groups
Monthly Spend	₹13K–₹17K
Customer Behaviour / Insights	Orders fresh organic produce and glass-bottle milk during morning slots.

Sub-ICP 47: Festival & Celebration Mindful Nuclear Family

Age	38–42 years
Income	₹21–29 LPA
Household Size	5 members
Orders per Week	10–13 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, Fresh Vegetables, Medicines
Pain Points	Last-minute grocery requirements for puja & family gatherings
Key Insight	High demand spikes for specialized puja items, flowers, sweets, and fresh dairy.
Acquisition Channels	RWA WhatsApp Groups, Apartment Communities
Monthly Spend	₹16K–₹20K
Customer Behaviour / Insights	Frequent morning orders for fresh flowers, traditional grocery, and sweet ingredients.

Sub-ICP 48: Work-From-Home Creative Parents

Age	32–36 years
Income	₹15–22 LPA
Household Size	3 members
Orders per Week	9–12 orders/week
Peak Ordering Time	Morning School Hours & Evening Dinner Time
Categories Purchased	Groceries, Dairy Products, School Supplies, Fresh Vegetables
Pain Points	Managing household needs while working on flexible creative deadlines
Key Insight	Flexible home schedules lead to active ordering throughout morning/evening windows.
Acquisition Channels	Meta Family Targeting, School Parent Groups
Monthly Spend	₹12K–₹16K
